

Empower your students to succeed in the electricity sector

Canada's electricity sector is growing—and with that growth comes a wide range of opportunities for your students.

To take advantage, they'll need to stand out by having the skills employers in the sector need. Work-integrated learning (WIL) can help them gain those skills and translate their theoretical knowledge into real-world practice so they can get hired after they graduate.

The **Empowering Futures** program from Electricity Human Resources Canada (EHRC) provides the WIL opportunities that will help set your students up for success.

Get involved today!

Participation is simple:

- 1 Contact the **Empowering Futures** Program Coordinator.
- 2 Share information about the program with your network of employers.
- 3 Offer more value to employers by helping them participate in the program.

Get Empowered.

Power up

- ⚡ Connect your students to valuable WIL experiences.
- ⚡ Improve the success rate of your graduates by helping them find jobs sooner.
- ⚡ Make your university or college a sought-after source of new hires.
- ⚡ Expand your relationships with electricity industry partners to enhance your programs and create even more opportunities for students.

"I had no idea I'd go into the electrical sector, but now that I'm in it, I certainly see a future for myself."

– Manjesh, Manufacturing Engineering Student, Ontario Power Generation
